

My absolute favorite radio station of all time is Air 1. I love the fact that I can turn on my radio, and listen to up beat music, with out the cussing, sex and violence in most music today. It is always uplifting, and refreshing to hear. I understand that there is a posiblity of you replacing Air 1 w/ an LPFM brodcast. I know that for me personaly and for alot of my friends that this would be a very big loss to our area. There are some teens who enjoy listening to up beat music w/o all of the bad stuff in it. Not only is Air 1 giving our community a choise in what to listen to, they are giving our community a positive alternitive so that people who don't like to hear the junk have an option. I strongly feel that Air 1 is a good thing for out community. They play good music that is uplifting. If playing uplifting music isn't in the public's best intrest I don't know what is. I feel strongly enough in there cause, that as a poor college student, I give them money to keep it commercial free. Please don't let an LPFM take it over in any community, because it is important for people to have options. Thank you so much.
